Supreme Engineering Works - Manufacturer of fins Punching ...

The overpull to cut the coil is only 25-30% of the yield of the tubing being cut (this can vary due to well bore friction, spalling of cutting grapple blades, etc.). The overshoot is not a releasable tool for upward travel, but it can be released to travel down hole (providing the shear screws have not been sheared).

Core Laboratories: Continuous Cutting Overshot

Pipe and tube manufacturers demand industrial-strength equipment to support their need for reliable product identification. Marking systems that are designed for use in harsh industrial environments ensure that product is properly marked without production interruptions.
