Force and Motion Lab Notebook: FOSS Middle School ...

The FOSS Force and Motion Course investigates linear motion, including position and several aspects of change of position—distance, displacement, speed, velocity, and acceleration. They investigate fundamental forces (gravity and electromagnetism) in familiar environments, such as pushes, pulls, impacts, and falls.

Motion and Matter provides grade 3 students with experiences around physical sciences core ideas dealing with forces and interactions, matter and its interactions, and with engineering design. The anchor phenomenon for the first three investigations is motion. Magnetism and gravity are the phenomena investigated as students look for patterns of motion to predict future motion.

Each learning journey should have a clear path. Each Performance Expectation comes at the top of the SEPUP Learning Pathway; a guide for sequencing activities showing connections between the three dimensions of the NGSS as well as Common Core Standards. Force and Motion bundles five PEs: PS2-1, PS2-2, PS3-1, ETS1-3 and ETS1-4.

Force and Motion | Lab Aids

Force and motion are fundamental to all matter in the universe and are integral parts of our daily lives. A force is a push or a pull on an object that is caused by an interaction with another object. Forces influence objects that are at rest or that are already in motion. Isaac Newton's three laws of motion describe how forces interact with objects to influence motion.
