Rain Bird ASVF Series Anti-Siphon Sprinkler Valves ...

The valve size (3/4" or 1") is determined by the water flow (measured in gallons per minute, or GPM) of the main line or the sprinkler circuit. 3/4" VALVES: 13 less. 1" VALVES: 14 more. Assembly of Sprinkler Valves to Pipe A sprinkler system is made up of one or more groups of sprinklers (called circuits) each operated by its own con- trol valve.

MultiPage PDF File - rainbird.com

The second type of valve is the sprinkler "zone valve." Each zone valve is piped to a set of sprin- klers. When the valve is turned on, either by hand or in response to an electronic signal from the controller, all the sprinklers piped to that particular valve go on. In most cases, there are several valves located together (called a manifold).

Troubleshooting and Maintenance Guide for ... - US | Rain Bird

Turn on the water at the "shut-off" to supply your system, then operate the valves manually to flush the system. Open each valve to flush the pipe with water, then close. Refer to the valve instructions for manual operation. You should do this with each valve.
