RAUPIANO PLUS is ideal for drainage of greasy waste water from commercial kitchens up to the grease separator. For lengthy grease waste lines, the use of pipe trace heating may be necessary. This prevents premature grease accumulation. The temperature of the pipe trace heating suitable for plastic pipes may not exceed 65°C.

RAUPIANO - Acoustic Drainage

Raupiano Plus pipes and fittings improve sound insulation performance through the innovative three-layer pipe and bend fittings with optimized mass concentration to further reduce air-borne noise transmission. This makes the Raupiano Plus the ideal solution for all types of buildings. Ideal alternative to cast iron system

Raupiano Plus Waste Water System | Rehau | Linkage

RAUPIANO PLUS Fittings The pipe system can experience local vibrations at redirections due to critical drainage conditions, which can have a negative effect on sound performance. Targeted mass optimization of this effect was carried out in sound-critical areas of elbows with a nominal width of DN 90 to DN 160.
