number of months. Progress does not. Hence the man-month as a unit for measuring the size of a job is a dangerous and deceptive myth. It implies that men and months are interchangeable. Men and months are interchangeable commodities only when a task can be partitioned among manyworkers with no communica-tion among them (Fig. 2.1). This is true of reaping wheat or picking

The Mythical Man-Month - Drexel CCI

This is a long overdue review of a long overdue read of the famous software project management book: The Mythical Man Month by Fed. P. Brooks, 1995 (1st ed. 1975). I've heard about it several years ago, about how relevant it still was to current projects and more precisely how well it described what is systematically going wrong in software development.

Brooks's law is an observation about software project management according to which "adding manpower to a late software project makes it later". It was coined by Fred Brooks in his 1975 book The Mythical Man-Month. According to Brooks, an incremental person, when added to a project, makes it take more, not less time.

Only slightly less famous than "No Silver Bullet" is another Brook's paper, "The Mythical Man Month". The papers are no less valid today than they were when written, but they receive a lot less attention. In "The Mythical Man Month" Brooks argues that adding people to a project doesn't speed it up.

Hence the man-month as a unit for measuring the size of a job is a dangerous and deceptive myth. It implies that men and months are interchangeable. When a task cannot be partitioned because of sequential constraints, the application of more effort has no effect on the schedule. The bearing of a child takes nine months, no matter how many women are assigned.

The Mythical Man-Month

Fred Brooks's book Mythical Man Month can be summed up pretty well with his eponymous law that he spells out at the end of the second chapter, "Adding manpower to a late software project makes it later". I hate to keep doing this but I'm going to bring up my internship again.

The contention in the Mythical Man-Month is that as you add folks to a software project, the communication needs to increase geometrically. For example, if you have 3 people on the project, that's 3 lines of communication. But if you have 4, that's 6 lines of communication. One extra person, in this case, leads to double the communication!
